FUTURISTIC DIRECTION VERTICAL CONTROLLED HYDROPONIC CONTAINER MOVEABLE FARM IN 40 FT CONTAINER

There is no doubt that this is the way plants will be grown in the future, right on the door step of the user.

This complete system has been designed by the Freight Farms in America, who have been at the forefront of controlled hydroponic container farming since 2010. This is a turnkey operation, where outdoor climate has no effect, plants grow 24/7 in a controlled environment, providing, temperature control, water, light and air circulation. No spray, pesticides or herbicides required, producing consistent premium quality products all year round.

Grow thousands of high-value crops like lettuces, leafy greens, herbs, roots, edible flowers, and more in just 320 sq. ft. It grows the plant from seed to harvest.

Making fresh food accessible to anyone, anywhere, any time with a complete platform of products and services. This system empowers our global community.

With this global infrastructure, the aim is to revolutionize local access to food for a more sustainable future.

The Greenery is equipped with high-efficiency LED lighting that simulates

sunlight and delivers growth-optimized spectrums of red and blue that plants need for photosynthesis and using as little as 19 litres of water a day, 4 times less than the average shower!

Intuitive climate controls automatically respond to air and water sensors to ensure an ideal growing environment. The containers can be monitored and controlled in real-time from any location. The added advantage is the closed environment keeps out unwanted organisms, eliminating the need for herbicides or pesticides. It means that 94% of crops are of marketable quality.

We are selling the Freight Farms' second-generation container farm, the Greenery, at below replacement cost. The Greenery represents all of the learnings Freight Farms had acquired from quantitative and qualitative analysis over the years. The new farm model features updated components design to improve yields, efficiency, and workflow.

This container can be relocated anywhere in the world,(presently situated in Battery Point, Hobart), comes with training and assistance from the current owner and Freight Farms. This allows the operator to grow, wholesale and retail produce to high value customers in the form of restaurants and the general public who appreciate a quality product.

This system is ideal for schools, and universities, Integrate Greenery into your curriculum, cafeteria, and campus showcasing sustainability initiatives. Highly suitable for the budding entrepreneur who wants a profitable and sustainable business venture, requiring a small amount of space. Motivated vendor looking for Offers Over \$149,000.
